

Hanbo Shim

 Hanbo Shim |  hanbo0918@kaist.ac.kr

RESEARCH INTEREST

My research focuses on advancing machine perception and 3D understanding, particularly by enhancing spatial reasoning capabilities in Vision-Language Models (VLMs). I am interested in leveraging data-efficient representation distillation to push the boundaries of multimodal learning and build highly capable, robust AI systems.

EDUCATION

- | | |
|---------------------|---|
| 2022 Aug - present | Bachelor's Program at KAIST
<i>Bachelor's Thesis:</i> Empirical Foundations of Multi-View Relational Distillation for Spatial Understanding in VLMs |
| 2025 Jan - 2025 Aug | Exchange Student at EPFL |

PUBLICATIONS

Multi-View Relational Distillation for Spatial Reasoning with Vision-Language Models
Kiet T. Nguyen, Hanbo Shim, Jinwoo Kim[†], Seunghoon Hong[†]
Under Review, 2026

WORK EXPERIENCE

- | | |
|---|----------------------|
| KAIST Vision and Learning Lab
Research Intern - KAIST School of Computing
Research in VLM spatial reasoning. Advised by Prof. Seunghoon Hong | Jan 2026 - June 2026 |
| EPFL AI Team
Deep Learning Engineer - EPFL
Participated in fine-tuning a vision model for face emotion recognition. | Jan 2025 - June 2025 |
| Superconducting Quantum Nanoelectronics Laboratory
Research Intern - KAIST Physics
Research in Adaptive Quantum State Tomography. Advised by Prof. Eunsung Kim | June 2024 - Aug 2024 |

AWARDS

Lemanic Life Science Hackathon
Scientific Excellence Award - EPFL Biological Sciences

Devised machine learning pipeline that achieved 90% test accuracy across 400+ plant genera classification, supporting scalable biodiversity analysis.
